Buổi 03: Chi tiết sản phẩm

Bước 01: Mở routes/Web.php sửa code tại route chi tiết sản phẩm:

@endif

</div>

```
Route::get("/index",[Pagecontroller::class, "getIndex"]);
Route::get("/loai-san-pham/{type}", [Pagecontroller::class, "getLoaisanpham"]);
Route::get("/chi-tiet-san-pham/{id}", [Pagecontroller::class, "getChitietsanpham"]);
Route::get("/lien-he", [Pagecontroller::class, "getLienhe"]);
Route::get("/gioi-thieu", [Pagecontroller::class, "getGioithieu"]);
Bước 02: Mở Pagecontroller.php thêm code vào hàm getChitietsanpham:
                public function getChitietsanpham(Request $req)
                    $sanpham = Product::where("id","=", $req->id)->first();
                    return view("page.chitiet_sanpham", compact("sanpham"));
Bước 03: Mở trang chitiet sanpham.blade.php sửa code như sau:
         @extends("master")
         @section("content")
         <div class="inner-header">
            <div class="container">
                <div class="pull-left">
                   <h6 class="inner-title">Sản phẩm {{$sanpham->name}}</h6>
                </div>
                <div class="pull-right">
                   <div class="beta-breadcrumb font-large">
                      <a href="index">Trang chủ</a> / <span>Thông tin chi tiết sản phẩm</span>
                   </div>
                </div>
                <div class="clearfix"></div>
             </div>
         </div>
<div class="container">
   <div id="content">
      <div class="row">
         <div class="col-sm-9">
             <div class="row">
                <div class="col-sm-4">
                   <img src="source/image/product/{{$sanpham->image}}" alt="">
                </div>
                <div class="col-sm-8">
                   <div class="single-item-body">
                      {{$sanpham->name}}
                      @if($sanpham->promotion_price==0)
                         <span class="flash-sale">{{number_format($sanpham->promotion_price)}} dong
```

```
<div class="clearfix"></div>
                      <div class="space20">&nbsp;</div>
                      <div class="single-item-desc">
                         {{$sanpham->description}}
                      <div class="space20">&nbsp;</div>
                      Don vị tính
                      <div class="single-item-options">
                         select class="wc-select" name="unit">
                             <option>DVT</option>
                             <option value="hôp" {{$sanpham->unit=="hôp"? "selected":""}}>hôp</option>
                             <option value="cái" {{$sanpham->unit=="cái"? "selected":""}}>cái</option>
                         <a class="add-to-cart" href="#"><i class="fa fa-shopping-cart"></i></a>
                         <div class="clearfix"></div>
                      </div>
                  </div>
              </div>
              <div class="space40">&nbsp;</div>
               <div class="woocommerce-tabs">
                  <a href="#tab-description">Mô tả</a>
                  <div class="panel" id="tab-description">
                      {p>{{$sanpham->description}}
                  </div>
              <div class="space50">&nbsp;</div>
Bước 04: Mở trang trangchu.blade.php sửa code những chố link tới chi tiết sản phẩm như sau:
  Tại phần sản phẩm mới
 <div class="single-item-header">
      <a href="chi-tiet-san-pham/{{$new=>id}}">
```

```
<img src="source/image/product/{{$new->image}}" height="250" alt=""></a>
</div>
<div class="single-item-caption">
    <a class="add-to-cart pull-left" href="shopping_cart.html">
        <i class="fa fa-shopping-cart"></i></a>
    ka class="beta-btn primary" href="chi-tiet-san-pham/{{$new=>id}}">
       Chi tiết <i class="fa fa-chevron-right"></i></a>
 Tại phần sản phẩm khuyến mãi
<div class="single-item-header">
   <a href="chi-tiet-san-pham/{{$pro->id}}">
   <img src="source/image/product/{{$pro->image}}" height="250" alt=""></a>
</div>
<div class="single-item-caption">
    <a class="add-to-cart pull-left" href="shopping_cart.html">
       <i class="fa fa-shopping-cart"></i></a>
      <a class="beta-btn primary" href="chi-tiet-san-pham/{{$pro->id}}">
           Chi tiết <i class="fa fa-chevron-right"></i></a>
    <div class="clearfix"></div>
</div>
```

Bước 05: Mở tập tin Pagecontroller.php và thêm code như sau:

Bước 06: Hiển thị các "sản phẩm tương tự" trong trang chitiet sanpham.blade.php và sửa code:

```
<div class="beta-products-list">
   <h4>Sản phẩm tương tự</h4>
   <div class="space30">&nbsp;</div>
   <div class="row">
      @foreach($sanpham_tuongtu as $sptt)
       <div class="col-sm-4">
           <div class="single-item">
               @if($sptt->promotion_price!=0)
               <div class="ribbon-wrapper">
                   <div class="ribbon sale">Sale</div>
               </div>
               @endif
               <div class="single-item-header">
                  Ka href="chi-tiet-san-pham/{{$sptt->id}}">
                      <img src="source/image/product/{{$sptt->image}}" height="250"
                      alt="{{$sptt->image}}"></a>
               </div>
               <div class="single-item-body">
                   {{$sptt->name}}
                   @if($sptt->promotion_price==0)
                      <span class="flash-sale">{{number format($sptt->unit price)}} dong</span>
                      @else
                      <span class="flash-del">{{number_format($sptt->unit_price)}} dong</span>
                      <span class="flash-sale">
                          {{number_format($sptt->promotion_price)}} dong</span>
                      @endif
                   </div>
               <div class="single-item-caption">
                   <a class="add-to-cart pull-left" href="product.html">
                       <i class="fa fa-shopping-cart"></i></a>
                   <a class="beta-btn primary" href="chi-tiet-san-pham/{{$sptt->id}}">
                       Chi tiết <i class="fa fa-chevron-right"></i></a>
                   <div class="clearfix"></div>
               </div>
            </div>
        </div>
       @endforeach
    </div>
   <div class="row">{{$sanpham_tuongtu->links()}}</div>
</div> <!-- .beta-products-list -->
```

```
<div class="col-sm-3 aside">
    <div class="widget">
       <h3 class="widget-title">San pham ban chay</h3>
       <div class="widget-body">
           <div class="beta-sales beta-lists">
                   @foreach($sp_banchay as $spbc)
                   <div class="media beta-sales-item">
                       <a class="pull-left" href="{{route('detailproduct', $spbc->id_product)}}">
                          <img src="source/image/product/{{$spbc->products->image}}"
                                alt="{{$spbc->products->name}}">
                       </a>
                       <div class="media-body">
                          {{$spbc->products->name}}
                          @if($spbc->products->promotion_price==0)
                            <span class="beta-sales-price">{{number_format($spbc->products->unit_price)}}</span>
                          @else
                              <span class="flash-del">{{number_format($spbc->products->unit_price)}}</span>
                              <span class="beta-sales-price">
                                  {{number_format($spbc->products->promotion_price)}}
                              </span>
                          @endif
